REASONS FOR ALLOWANCE

Claims 1-14 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the prior art references cited by applicant which are listed on the forms PTO-1449 submitted with the Information Disclosure Statements filed on July 1, 2003 and October 23, 2003 have been considered. The examiner additionally cites Gimmler et al. '789, Hodge '487, Hinkel '456, Murata '196, Sasse '243, Sasse et al. '021, Yamamoto et al. '582 and JP 2-6111(A) each of which show support elements used in conjunction with a torque converter stator.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests a hydrodynamic torque converter including the specified support element arranged together with the structure set forth in the only independent claim 1, and particularly wherein the support element includes at least one flow passage for viscous medium connecting at least one flow conduit to the hydrodynamic circuit, and further wherein the at least one flow passage is defined by a flow bed facing the stator, at least one boundary wall extending from the flow bed to the stator side of the support element, and at least one stiffener connecting the flow bed and the at least one boundary wall.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
